Lowara at the top

Emirates Towers Hotel provides a dramatic backdrop to Dubai's skyline. Surrounded by landscaped gardens, ornamental lakes and waterfalls the hotel is situated in the central business and commercial district. It is within walking distance of the World Trade Centre, Dubai's financial markets and the Dubai International Exhibition hall.

Also with 54 floors, the office building is the tallest in the Middle East and Europe, and the ninth tallest in the world.

The tower has 47 floors of rented space based on a triangular layout. Contractor for the office block is Aster Limited of the U.A.E.

Linking the two towers is the Emirates Towers Shopping Boulevard. This retail plaza features spacious walkways linked by sky-lit courtyards, exclusive shops, theme restaurants and coffee shops.

Details of Lowara's range can be found at www.lowara.com.
